

# Environmental Policy

**M**itsubishi Polysilicon understands the necessity of coupling a successful Environmental Management System with the production of semi-conductor grade Polysilicon for the semiconductor industry in order to protect the environment and preserve our natural resources. In order to ensure this necessity, our top management fully supports the Environmental Management System.

**M**itsubishi Polysilicon's Environmental Management System has developed methods and procedures to determine the impact of its activities, services, and products on the environment; to set objective environmental goals for reducing environmental impacts; to stay in compliance with all Federal, State and Local environmental regulations or other requirements; to continue to improve our performance through pollution prevention and waste minimization activities; and establishing periodic checks of the status of achieving our environmental goals.

**M**itsubishi Polysilicon's Environmental Management System will place emphasis on:

- **Continual improvement to meet or exceed Environmental Goals.**
- **Reduction and recycling of waste over disposal.**
- **Compliance with all Federal, State, Local and other Environmental Regulations.**

**M**itsubishi Polysilicon is committed to being a good neighbor and corporation by using a variety of methods including procedures, technological advances, education of our employees, contractors, visitors and customers, interaction with the community, and other responsible practices to insure our Environmental Management System is effective.
