

Quality Policy

Mitsubishi Polysilicon is committed to maintaining and improving a Quality Management System that is **compliant to ISO 9001**. Top management fully supports the Quality Management System so that we will achieve our quality goals and objectives.

Mitsubishi Polysilicon strives to **meet or exceed customer expectations**. We will do this through product performance, technical service and on-time delivery. Product performance is achieved by consistently working our processes in our facility with trained and dedicated employees. We will achieve the 100% on-time delivery by utilizing consistent methods and partnering with qualified suppliers to help us achieve this goal. We strive to be the industry's preferred supplier of polycrystalline silicon.

Mitsubishi Polysilicon will **continually improve** our Quality Management System through an effective use of internal and external communications, management reviews, audits, monitoring, measurement and analysis of data, and our corrective and preventive action programs. We constantly look for ways to improve our processes, procedures, people and products because we realize that quality is a never-ending process.
